## DELIBERATELY LIGHT AND BREATHABLE

The FIRE RECON THL family offers the current highest technical standard that can be achieved for the increasing requirements and application scenarios of technical assistance and sets new standards in terms of comfort and fit.

The 1-layer structure ensures excellent breathability. This is of great importance in order to keep moisture such as sweat away from the body in the best possible way and thus maintain the wearer's performance. This in turn reduces the risk of the body overheating.

Being able to combine jacket and trousers into a closed system prevents rising heat and other pollutants from entering. The width adjustment of the trouser legs and cuffs also takes this into account and thus offers the wearer optimal protection for the special requirements of technical assistance. Thanks to the special yellow colour of hi-vis (high visibility), people can be optimally visible in the dark and in poor weather conditions.

Designed as deliberately light clothing, the Fire Recon THL can also be used to fight forest and vegetation fires. The Fire Recon is also available in an additional Wildland version with a different colour scheme.

## TFX

The TFX outer fabric is a flame retardant, durable and lightweight fabric developed exclusively for Texport®.

TFX offers very good lightfastness, very good abrasion resistance, it's lightweight but almost as strong and has one particularly pleasant wearing comfort as well as keeps its colour after many washes.

**Shoulder reinforcement**  
abrasion protection

**Radio pocket**  
length adjustable, with side zipper

**Connection zipper**  
for jacket and pants

**Step-in gusset**  
easier donning and doffing
