

FIREWEAR

NX 2012

HIGHEST PROTECTION, BEST DESIGN,
OPTIMAL FUNCTIONALITY.

TEXPORT.AT

TEXPORT[®]
PROTECTING YOU.

› Stand-up collar (width adjustable, with hanger)

› Shoulder reinforcement (abrasion protection)

› Rescue strap (external)

› Flashlight loop
(triple lock, length and
width adjustable)

› Loop system (for Texport belt systems)

› Ergonomically preshaped sleeves
(increased movability)

› Grab tab (ergonomically designed)

› Front pockets (external)

› Cuff (width adjustable,
with thermo wristlet)

› Inspection openings (internal)

› Adjustable waist (individually adjustable)

› Pockets (inserted pocket and reach-through)

› Cargo pockets (external, right hand side
with knife pocket)

› Knee reinforcement (abrasion protection)

› Step-in gusset
(easier donning and doffing)

› Ergonomically preshaped legs
(increased movability)

› Cuff outside (abrasion protection,
inner leg and hem)

› Cuff backside (width adjustable,
with heel cut-out)

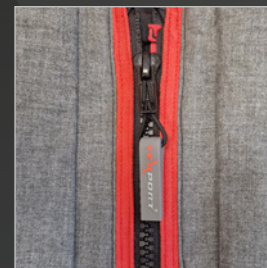

WE ARE ONLY SATISFIED WITH THE VERY BEST

AIR X BLOCKER®

The insulation system in the shoulder area guarantees more safety through a permanent air cushion that rises from protectors in the inner lining and also stays upright when carrying respiratory protective equipment. The trapped air isolates this exposed area.

HPX X SYSTEM®

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

TEXTOR TRIPLE X FABRIC®

The TEXTOR Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silverstripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXTOR Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0

*3M EU Patent 1974621

ERGO X PAD®

The TEXTOR Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flameresistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

WICKING X BARRIER

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.

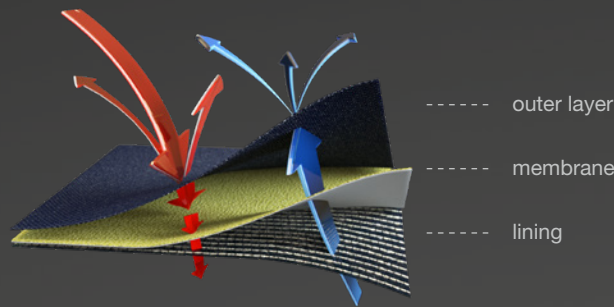

Twin Spacer

BALANCED
MATERIAL PERFORMANCE
FOR OPTIMAL PROTECTION.

The Twin Spacer material structure combines optimal insulation and breathability in combination with a good weight performance. The product's balanced character combines wear and weight with optimal protection in compliance with European Norm EN 469.

Material composition

The Twin Spacer material structure consists of three layers:
outer layer, membrane (GORE-TEX Fire Blocker N) and lining (Twin Spacer)

ONE BELT,
MANY FUNCTIONS

For all NX 2012 jackets with the standard loop-system included, our innovative belt system series by TEXPORT can be used optionally as an integrated rescue system (IRS). The various belt systems are characterised by heat resistance, wear comfort and easy handling. Thanks to extensive accessories there is also the option of assembling the systems individually and so meeting the widest possible range of needs of a fire brigade. Another advantage is that the tether/rescue loop can be very easily threaded in or out thanks to the well-thought-out construction. This makes proper inspection, maintenance and proper cleaning of the jacket easier.
