➤ Cuff backside (heel cut-out)

Fig. Fire Basic Redline, WA19, 203

Basic

THE BASIC MATERIAL COMPOSITION FOR OPTIMAL FUNCTIONALITY.

Composition with textile insulation membrane system

The Nomex® NXT outer layer in combination with the GORE-TEX Fireblocker membrane and thermal lining provide high thermal protection. This standard composition is the basis for great protection and high breathability.

100 % waterproof

Item description	Outer layer	Composition code	Composition: outer layer / membrane / lining	Colour variants	
Fire Basic Jacket Redline Fire Basic Trousers Redline Fire Basic Jacket		W A 19	Nomex® NXT Fireblocker N * Lining		
Fire Basic Jacket Redline Fire Basic Trousers Redline		W A 23	Nomex® NXT Fireblocker N * Lining		

* GORE-TEX Moisture Barrier with GORE® CROSSTECH® Product Technology

Material composition

FIRE BASIC is made up of three layers:
outer layer, membrane (GORE-TEX Fireblocker N) and thermal lining (aramid fleece)

WE ARE ONLY SATISFIED WITH THE VERY BEST.

The TEXPORT® Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silver-stripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXPORT® Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0
*3M EU Patent 1974621

The TEXPORT® Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flame-resistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.
