› Knee reinforcement (abrasion protection)

› Cuff outside (abrasion protection, inner leg and hem)

› Cuff inside (dirt protection)

› Cuff backside (heel cut-out)

Fig. Fire Survivor, ZA16, 203

WE ARE ONLY SATISFIED WITH THE VERY BEST.

AIR X BLOCKER®

The insulation system in the shoulder area guarantees more safety through a permanent air cushion that rises from protectors in the inner lining and also stays upright when carrying respiratory protective equipment. The trapped air isolates this exposed area.

HPX X SYSTEM®

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

TEXTURE TRIPLE X FABRIC®

The TEXTURE® Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silver-stripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXTURE® Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0

*3M EU Patent 1974621

ERGO X PAD®

The TEXTURE® Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flame-resistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

WICKING X BARRIER

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.

FIRE SURVIVOR
BELT SYSTEM

One belt, many functions

For all of the Fire Survivor jackets with the Bear and Loop functions, our innovative belt system series by TEXTPORT® can be implemented as an optional integrated rescue system (IRS). The varied belt systems stand out through heat protection, comfort and simple handling. Thanks to the extensive range of accessories, there is also the possibility to put together systems individually and in doing so to meet the most varied requirements of a fire department. Another advantage is that the harness/rescue strap can very easily be threaded in and out through the well-thought-out design. Therefore, standard inspection, maintenance and correct cleaning of the jacket are made easier.
