FIRE STRETCH

HIGHEST PROTECTION, BEST DESIGN,
OPTIMAL FUNCTIONALITY.

TEXPORT.AT

TEXPORT[®]
PROTECTING YOU.

WE ARE ONLY SATISFIED WITH THE VERY BEST

The insulation system in the shoulder area guarantees more safety through a permanent air cushion that rises from protectors in the inner lining and also stays upright when carrying respiratory protective equipment. The trapped air isolates this exposed area.

With the HPX System®, changing a defective zip is no longer expensive and complicated, but simple and affordable. Through the High Performance eXchange System, or HPX System, the lifespan of protective clothing is increased significantly. In addition, thanks to the striking design it is immediately visible whether or not the front part is fully closed. That makes it even safer.

EU Patent 07121066.0

The TEXTPORT Triple Fabric® is a textile reflective stripe that is made from fabric and therefore is extremely breathable and more durable. The reflective, silver-stripe material composition, patented by 3M*, adheres very well to the structure of the soft fabric. In addition, the TEXTPORT Triple Fabric® is abraded less severely through wear and washing.

EU Patent 08102991.0

*3M EU Patent 1974621

The TEXTPORT Ergopad® is a cushioned, ergonomically preformed knee pad that fits the knee in every place and avoids creating pressure marks. It is flameresistant and does not become saturated with water, in contrast to the aramid non-woven padding, so that the trousers dry much more quickly after washing.

The wicking barrier is permanently waterproof, breathable and wash-resistant. That means even after many uses and washes, the clothing's lining remains completely dry thanks to the GORE-TEX barrier, as no more moisture can enter through the seams.

» Stand-up collar (width adjustable, with hanger)

» Drag system (rescue strap integrated)*

» Dynamic element (improved side visibility)

» Upper arm pocket (external, left)

» Radio pocket (length and width adjustable)

» Flashlight loop (triple lock, width adjustable)

» Loop-System (for Texport IRS belt system)*

» Rank tab (grade identification)

» Grab tab (ergonomically designed)

» Front pockets (external)

» Cuff (width adjustable, with thermo wristlet)

» Adjustable waist (individually adjustable)

» Pockets (inserted pocket)

» Cargo pockets left (external)

» Cargo pockets right (external, with knife pocket and tool holder)

» Stretch area (freedom of movement)

» Knee reinforcement (abrasion protection)

» Ergonomically preshaped legs (increased movability)

» Cuff outside (abrasion protection, inner leg and hem)

» Cuff backside (heel cut-out)

» Cuff inside (dirt protection)

*included in the Fire Stretch jacket Bear version

TEXPORT IRS – INTEGRATED RESCUE SYSTEM

ONE BELT, MANY FUNCTIONS

For all TEXPORT jackets with the Bear and Loop functions, our innovative belt system series by TEXPORT can be implemented as an optional integrated rescue system (IRS).

The varied belt systems stand out through heat protection, comfort and simple handling. Thanks to the extensive range of accessories, there is also the possibility to put together systems individually and in doing so to meet the most varied requirements of a fire department. Another advantage is that the harness / rescue strap can very easily be threaded in and out through the well-thoughtout design. Therefore, standard inspection, maintenance and correct cleaning of the jacket are made easier.

TEXPORT DRAG SYSTEM

DRAG SYSTEM

The FIRE STRETCH jacket Bear includes as standard an integrated drag system in the upper back area of the jacket which is made of Aramid-webbing.

This facilitates the immediate rescue of a fireman from a directly life-threatening situation.

100 % waterproof

THE INNOVATIVE MATERIAL COMPOSITION FOR MORE PROTECTION AND COMFORT – LIGHT VERSION

X-TREME® light offers heat protection that significantly exceeds the values set out in the European norm EN 469, whether in direct contact with flames or heat radiation. When developing X-TREME® light, the focus has been strongly on the weight. X-TREME® light combines excellent protection with significantly improved comfort, supported by the material's light weight.

Material composition

X-TREME® light is made up of three layers: outer layer, intermediate layer (heat comfort barrier) and membrane / flameliner (GORE-TEX Flameliner® G and GORE-TEX® moisture barrier with GORE® CROSSTECH® product technology).

Item description	Outer layer	Composition code	Composition	Norm	Colour variants	
FIRE STRETCH jacket Bear FIRE STRETCH jacket FIRE STRETCH trousers		Y A 14	IB-TEX® Heat Comfort Barrier Flameliner 2L *	EN 469, EN 1149-5	203 dark blue 010 gold	151 brilliant red
FIRE STRETCH jacket FIRE STRETCH trousers		Y A 16	Nomex® NXT Heat Comfort Barrier Flameliner 2L *	EN 469, EN 1149-5	203 dark blue	
FIRE STRETCH jacket Bear FIRE STRETCH trousers		Y A 11	PBI® LP Heat Comfort Barrier Flameliner 2L *	EN 469, EN 1149-5	010 gold	

* GORE-TEX moisture barrier with GORE® CROSSTECH® product technology

OPTIMUM IN FIT AND COMFORT

The FIRE STRETCH suit opens up new dimensions in fit and wear comfort in fire-fighting clothing. The Fire Stretch family has special stretch-areas and combines these with an especially short jacket and cut of the trousers that allows for great freedom of movement. The family offers the best possible freedom of movement in every situation. Furthermore, the suit offers all the essentials one expects from high-quality, modern fire-fighting attire.
