# 20471 – MAXIMUM VISIBILITY AT ANY TIME OF DAY

The SUPERIOR 20471 is certified according to the EN ISO 20471 standard, emphasizing its high-visibility properties already in its name. The SUPERIOR features a specially designed reflective stripe arrangement that ensures the human body silhouette remains clearly recognizable in any position, enabling the fastest possible and optimal visibility under all lighting conditions — during daylight as well as in darkness under headlight illumination.

## GORE-TEX® PYRAD® STRETCH TECHNOLOGY

The GORE-TEX® PYRAD® STRETCH technology provides excellent flame resistance and prevents heat transfer while maintaining very high breathability.

The technology features self-extinguishing protection through the formation of a protective char layer and does not crack or break open. At the same time, it offers protection against chemical liquids, protection against bloodborne pathogens, is waterproof, and is up to 50% lighter than other garments.

## STRETCH FOR MORE FREEDOM OF MOVEMENT

The GORE-TEX® PYRAD® STRETCH offers exceptional elasticity and 25% greater breathability. This provides the wearer with noticeably greater freedom of movement during daily work, without compromising on protection.

## SUPERIOR 20471

Item description	Outer layer	Composition code	Composition	Norm	Colour variants
SUPERIOR 20471 jacket SUPERIOR 20471 trousers	GORE-TEX® CROSSTECH® Pyrad® Stretch 2L	T A 19	GORE-TEX® CROSSTECH® Pyrad® Stretch 2L / Nomex® Viscose	EN ISO 20471, EN 1149-5, EN 16689, EN 343	537 HiVis yellow / dark blue

## FULLY EQUIPPED EVEN FOR COLD DAYS

The SUPERIOR thermal inner jacket offers an optimal supplement for colder days, which can be zipped into the SUPERIOR using a zipper.

## OPTIONAL: WITH HOOD

## SUPERIOR 20471

The SUPERIOR 20471 is an exceptionally lightweight, technical suit featuring GORE-TEX® PYRAD® STRETCH technology. This technology provides excellent flame resistance, prevents heat transfer while maintaining a very high level of breathability, and offers noticeably improved freedom of movement thanks to its elasticity.

The SUPERIOR provides enhanced protection in adverse weather conditions, at dusk, or at night through its high-visibility properties (EN 20471) and a specially designed reflective stripe arrangement. With the optional thermal inner jacket, which can be zipped into the SUPERIOR using a zipper system, as well as the optional hood, the garment is suitable for year-round use and all weather conditions.
